a first front chock adapted to associate with a front side of the first wheel and adapted to associate with the first and second cradle bars;

a first rear chock adapted to associate with a back side of the second wheel and adapted to associate with the first and second cradle bars;

a first dolly adapted to couple to the first and second cradle bars in front of the first wheel to lift the first wheel off a ground; and

a second dolly adapted to couple to the first and second cradle bars in back of the second wheel to lift the second wheel off the ground.

- 49. (New) The apparatus according to claim 48, where the first dolly and the second dolly each has an actuator and a pair of arms, each of the arms having a pivotal end and a free end, the pivotal end of each of the arms pivotally coupled to the actuator.
- 50. (New) The apparatus according to claim 48, further including a second front chock adapted to associate with a back side of the first wheel.
- 51. (New) The apparatus according to claim 48, further including a second rear chock adapted to associate with a front side of the second wheel.
  - 52. (New) An apparatus for transporting a cycle, comprising: means for lifting a first wheel of a cycle off a ground; means for lifting a second wheel of a cycle off the ground; and means for transporting the cycle onto a back-bad of a tow truck..--

## **REMARKS**

Claims 1-47 are subject to a restriction requirement for allegedly claiming more than one distinct invention. The examiner asserts that the claims are directed to the following patentably distinct species of the claimed invention: A) Figs. 1-11; B) Figs. 12-20; C) Fig. 21; D) Fig. 22; Fig. 23; and F) Fig. 24. In response, Applicant provisionally hereby elects, with traverse, claims 1-45 that are directed to Fig. 24. Accordingly, claims 46 and 47 have been provisionally canceled. Claims 48-52 have been added directed to Fig. 24.
